

Motivation Letter

Dear 42 Heilbronn Team, I am Mohammad Eisa (intra name= moeisa) and I have joined the campus on 13, March 2023.

My intent here is to apply for the scholarship which is offered to students who cannot afford their living during studying at 42 Heilbronn. This is my **third time for applying to scholarship** and I would not like this attempt to have the same output as the last two. I am here on **42 Heilbronn course visa** which is AUSBILDUNGSPROGRAM Visa only limited to the course here. As directed by the immigration office of Heilbronn, I am **not allowed for part time work** to earn for my livings. My monthly charges are more than 900 Euros and it is highly unsustainable for me to continue with bearing such a high cost of living on monthly basis.

I have a very strong desire to learn coding and 42 Heilbronn is the best way to pursue my passion. I have entrepreneurial mindset and I have created my companies too. Similarly, for the last two years, I also gained industrial experience while working on a technology based startup that would provide online travel services. I am fully dedicated to my learning and trying to leave no stone unturned. I want to continue this rhythm in my 42 Heilbronn journey as well. Neither I nor my family can support the finances of my living during the study at Heilbronn; it is hereby requested to you that please consider me an eligible candidate for the scholarships in the campus.

Excellence in coding requires ample amount of time and energy along with focused mind. Hence, the provision of this scholarship will give me a chance to learn in the campus with full dedication and zeal without having any worry of the finances of my living. Studying at 42 Heilbronn will be a life changing experience and I do not want to miss this opportunity because of financial matters. I am looking forward for a very positive response from your side. Thank you for your time and consideration.

Sincerely,

Mohammad Eisa
